INDIANAPOLIS STREET RAILWAY LINES

The index letter shown in parenthesis after street descriptions or intersecting streets in the Street Directory refer to the nearest car line to that point. To find what car runs nearest to a given number, find the number in the Street Directory, and the letter given after the nearest intersecting street, indicates the car line in the following street railway routes.

A — Pennsylvania Street Line.

From Meridian and Georgia n to Maryland, land e to Pennsylvania, n on Pennsylvania to Sixteenth, e on Sixteenth to Talbott, n on Talbott to Twenty-second. Returning cars s via same route to Georgia, w on Georgia to Meridian

A-1 — Lexington Avenue Line.

Indianapolis City Directory

—1921—

STREET and AVENUE GUIDE

AND

Directory of Householders

(COPYRIGHT, 1921.)

THE Street Directory is an alphabetical arrangement of the names of the Streets and Avenues of the city. By the decimal system of numbering houses adopted in this city, one hundred numbers are allotted to each square. On streets running north and south the numbering begins at Washington street. The streets running east and west are numbered East and West from Meridian street. All other streets not commencing at either of the above points are numbered in accordance with this system. Even numbers occur on the north and west sides of streets and odd numbers on the south and east sides. The name of intersecting streets and avenues, printed in black, and placed to the right of the column are given in the order in which they occur, which enables one to tell between what streets a certain number is. For instance, you have 315 Bicking street; by reference to the Street Directory, you find Alabama intersecting at 300 and High at 350; consequently, the place you wish to find is between Alabama and High streets.

In some of the outlying districts the street numbers are incorrect, the houses not numbered, or so scattered that it was not advisable to include in this issue. The name of every city street, however, is given with full description.

The index letter shown in parenthesis after street descriptions or intersecting streets indicate the nearest car line to that point. To find what car runs nearest to a given number, refer to the street and number, and the letter given after the nearest intersecting street indicates the car line in the list of routes on preceding pages.

In this department of the City Directory the number of each building on the street is given in numerical order and opposite the number is placed the name of the householder. In the business blocks containing offices, the occupant of each room is shown by number where practicable.

The profession, business, etc., of individuals and firms are only given at their respective places of business; to find the occupation of any householder refer to the Alphabetical portion of the Directory.
